The inkjet advantage

EPSON®
EXCEED YOUR VISION

Contents

From small business to large enterprise use, Epson offers a wide range of inkjet printers that can help save money, time and unnecessary hassle. From mono to colour and A4 to A3+, you are sure to find your perfect printer.

Advantage Inkjet

Be more productive and reduce your environmental impact by switching to an Epson inkjet printer.

Less energy

Significantly reduce your energy costs by switching from a laser printer to an Epson inkjet printer. Epson inkjet printers use up to 95% less energy than a laser printer[1].

Less user intervention

Switch from a laser printer to an Epson inkjet printer to save time and be more productive. An Epson inkjet printer is up to 3.5 times faster[2] and requires up to 98%[3] less user intervention compared to a laser printer.

Less waste

Switch from a laser printer to an Epson inkjet and reduce waste. With fewer replacement parts, Epson inkjet produce less waste, therefore reducing the environmental burden of manufacturing and recycling additional resources.

The evolution of inkjet

Reliable, fast and built to last, inkjet printers bring quality, speed and value to any business. Not only that, but they reduce costs and have a reduced impact on the environment.

Our business inkjet range sets the standard of quality, reliability, performance and cost-efficiency thanks to our PrecisionCore technology.

Business inkjet printers use an elegantly simple mechanism that prints without heating or contact. These unique features enable inkjet technology to deliver performance beyond just high speed and high image quality printing.

Epson inkjet Vs laser printing process

Laser printing process

| Receive print job | Preheat the fuser to 200°C approx | Charge the photoreceptor drum | Laser exposure | Development | Toner transfer | Fusing | Print out |
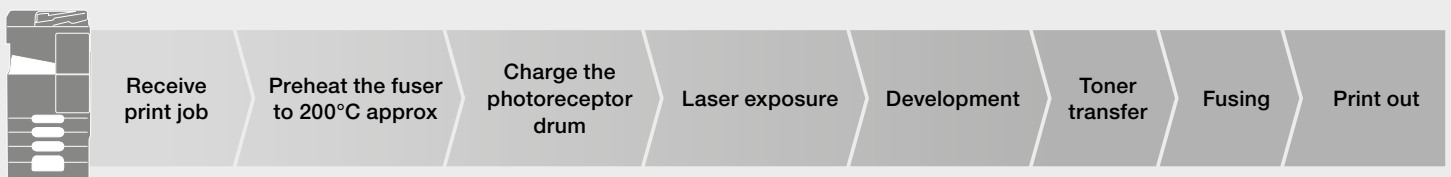

Inkjet printing process

| Receive print job | Paper passes under the printer head | Print out |
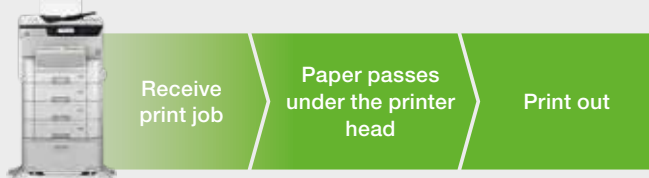

Putting inkjet to the test

Independent tests by the Keypoint Intelligence Buyers Laboratory Inc. – the world's leading test centre for the printing and copying industry – proved conclusively that Epson inkjet technology offers superior performance compared to laser.

Save time: accelerate your business

Epson business inkjet printers are up to 3.5 times faster than lasers or colour copiers[2] – without compromising on quality.

Eco friendly: print responsibility and save on costs

As inkjet printers use no heat in the printing process, they consume far less power than laser printers, which in turn reduces the running cost.

Less intervention: increase productivity and minimise downtime

Increase your business productivity with fewer service calls, fewer mis-feeds and less time spent on changing supplies. Our business inkjet printers reduce time spent on user intervention by 98%[3] compared to lasers and copiers.

Smooth and secure integration: printers suited to your business

Independent tests show that Epson's business inkjet printers rate highly in areas such as reliability, ease of network set-up and usability allowing for a hassle-free integration.

PrecisionCore technology

With the flexibility to deliver high-speed solutions for commercial, industrial and office printing, PrecisionCore continues and extends Epson's tradition of providing renowned colour quality and output durability across the widest range of applications.

Speed
PrecisionCore printhead technology delivers industry-leading output quality at high speed. Epson print chips are one of the fastest inkjet printing technologies in the world.

Quality
PrecisionCore has up to three times the nozzle density of conventional Epson piezo printheads. This dot precision is particularly important for creating sharp text and fine lines.

Reliability
PrecisionCore uses the power of the piezo crystal itself to raise reliability. The piezo element has the ability to self-diagnose its health almost instantly.

Ink & media flexibility
PrecisionCore's micro-mechanical firing element allows for more colourful and durable ink formulations compared with heat-based inkjet systems.

Scalability
PrecisionCore is a scalable technology suited for products ranging from industrial systems to desktop printers.

For more information please visit www.epson.co.uk/precisioncore

High quality, low cost inks

Printing costs are a concern for any business, which is why Epson offers a range of ink cartridge sizes that can be replaced individually to make printing cost-effective and hassle-free. Epson's DURABrite Ultra and DURABrite Pro inks are also ISO 11798 certified, producing longer lasting prints in any business environment.

Perfect prints

Enhance your printed materials with high-quality graphics. By doubling the nozzle density, the new PrecisionCore print head produces 600dpi high-quality printing on plain paper.

Business quality documents

Increased pigment concentration in DURABrite Pro Ink produces brighter colours. As the pigment sits on the surface of the paper, the prints are hardly visible on the reverse side.

More choice

As ink is directly ejected, you can print on a wide range of paper, and because the ink partially penetrates the paper fibres, the ink doesn't fade over time.

Amazingly durable

As the pigment is infused with resin and also insoluble, you can benefit from durable prints resistant to water, smudging and highlighter pens.

Business imaging solutions

Epson solutions

Epson Device Admin

Control, analyse and manage your printer fleet centrally from one intuitive interface, designed to increase productivity, reduce costs and ensure maximum security of your print fleet.

Epson Print Admin (EPA)

EPA is a server-based solution that creates a secure printing, scanning and copying environment through user-authentication with card readers, logins/passwords and PIN codes. It also offers additional features such as 'scan and send to me' (email and folder), employee-education notifications and enhanced administrative tools that provide welcome boosts to productivity, environmental goals and efficiency.

Epson Print Admin Serverless (EPA Serverless)

Enables business customers to seamlessly integrate the WorkForce Enterprise series into their security and compliance rules and regulations without the burden of maintaining a server system.

Document Capture Pro Server 2.0

For our multi-function devices, Document Capture Pro Server 2.0 is powerful server-based software that allows administrators to manage advanced push scan functions without having to install software on individual computers. Scan to cloud, FTP and Microsoft SharePoint® at the touch of a button. For more advanced needs, add your own connectors with our self-developer kit.

Mobile and cloud printing

Turn your tablet or smartphone into a powerful office assistant. Epson's mobile and cloud printing services allow you to print and scan from your smartphone and tablet – in the office and on the go.

Third party integration

OP

Epson Open Platform (EOP)

Gain complete control of your printing operations via a web-based application that enables you to adapt your printer to meet specific and changing business requirements with solutions that help you better manage your printing.

EOP makes our revolutionary multi-function printers (MFPs) fully flexible and customisable, enabling them to adapt to meet specific and changing customer requirements as business goals and enterprise IT systems evolve. Third party ISV solutions are compatible with Epson Open Platform devices.

More information about Epson and third-party solutions

Discover how Epson and its partner solutions take advantage of our printers to meet the needs of businesses from SMBs to large enterprises, and can be adapted to suit vertical market needs.

WorkForce Enterprise

Radically fast ISO print speeds of up to 100ppm, departmental office printers that deliver the ecological benefits that only inkjet technology can offer.

WorkForce Enterprise Colour
WF-C20590D4TWF and WF-C17590D4TWF

A3+ colour 4-in-1 printer

Ultra-fast ISO print speeds of up to 100ppm

High capacity ink cartridges producing up to 50,000 pages in colour and 100,000 pages in mono

5,350-sheet paper input with maximum paper feed

4,000-sheet finisher unit with optional shift/stack/staple

Low power consumption - an average of 180W consumption while copying and a maximum of 320W

WorkForce Enterprise Mono
WF-M20590D4TW

A3+ mono 3-in-1 printer

Ultra-fast ISO print speeds of 100ppm

High capacity ink cartridges producing up to 120,000 pages in mono

Managed print and service

CoverPlus

Keep your business moving with CoverPlus

CoverPlus provides exceptional service and support to give our customers peace of mind. We'll help you choose the printers best suited for your needs and then provide high-quality ongoing support. CoverPlus ensures maximum up-time for your business, helping to protect your investment and allowing you to focus on your business.

Up to five years' service and on-going support gives you added confidence in your investment

Service delivery and repair within two working days reduces unforeseen down-time

Visibility of total cost of ownership minimises unexpected service costs

Print365 offers hassle-free print management

No matter how big or small your printing needs are, you can relax in the knowledge that your business printing will be more cost-effective and interruption free. Benefit from on-site maintenance wherever and whenever you need it, automatic ink supply delivery, and a fixed-cost printing service that puts you in control.

Take control of your printing expenses with Epson Print Performance

A solution that accurately tracks and cuts printing costs. The pay-per-print includes all supplies, their automatic supply and on-site Epson warranty for the length of your contract.

No unexpected costs, just pay for what you print. No supplies ordering, no additional costs, no hassle — even for decentralised print fleets.

Committed to corporate and social responsibility

Epson is committed to developing environmentally conscious products, which means that sustainability is considered from conception to completion. We help customers recognise the environmental gains brought on by technology, whether it is redefining manufacturing through innovative robotics, saving energy with our office printing technology or revolutionising textile printing with digital solutions.

We are committed to all 17 United Nations' sustainable development goals and to the aims of the circular economy. We offer sustainable innovations because we recognise that the choices we make as organisations, individuals or a society will be essential to our shared success.
